Building tech futures for youth

Are you wondering what to do next?
Do you enjoy connecting with the world digitally?

Turn that passion for technology into something bigger, maybe even a career!

This series of tech boot camps will provide you with a combination of technology background and hands-on experience in a fun, intimate and casual environment. Start your journey with one (or more!) of our digital boot camps.

- **3D Design & Printing**
- **Android App Development**
- **Audio Engineering**
- **Video Game Development**

Why join?

- It's fun!
- Learn new technologies
- Ignite a passion that could lead to scholarships or a job!
- Meet young people who work in the Kelowna tech industry
- Bursaries available for eligible youth*

*For candidates referred by Okanagan Boys and Girls Club s or an affiliated program or advisor.

Building tech futures for youth

3D Design & Printing
Do you want to create something you can actually touch?

- Learn skills to design your own 3D projects
- Easy concepts and opportunity for creativity
- Discussions about what 3D printing can be used for and what materials are available; Each student will receive one printed project.

Android App Development
Let's be honest – you spend hours a day with your favourite apps! Why not learn how to create your own?

- Learn what an app looks like from the back-end
- Fundamentals of app programming and the design aspect of app making
- Developing apps compatible and usable with Android phones and tablets
- Creating apps on a desktop computer in the lab and can be run at home on Windows, Linux and OSx

Audio Engineering
Do you love listening to music and watching TV or movies? Be part of the creation process!

- Creating sound effects for film/video sound to film clips
- Setting up mics and using props to design sounds for on-screen visuals
- Operating professional recording studio equipment
- Syncing sounds with video to make the scene come to life

Video Game Development
Spend time creating games that you love playing!

- Fundamentals of video game programming and design
- Working with 2D engines to design games
- Discussion on computer science and industry opportunities

What's next? The opportunities don't have to stop there!

- Opportunity to attend more boot camps
- Access to college-level courses (Gateway to Tech)
- Career and college planning with My Blueprint
- Connect with mentors with real-world experience
- Potential volunteer teaching opportunities
- Scholarship opportunities for post-secondary programs in technology.
